

Oxford City Branch

Produced fortnightly by Paul, Jonathan and Hugh, plus contributions from other ringers.

Monday 21st January 2013

Stop Press! News came through last Friday from Charlotte Everett announcing the safe arrival of her great-granddaughter – Janna (8lb 8ozs), born to Damaris and Jack in the early hours of Friday morning. Mother and baby are both doing well! As you can imagine Steve and the rest of the Everett family are over the moon! Many congratulations from all of us! Paul.

Branch Practice at Witney (8)

Despite the bitter cold easterly wind there was a warm welcome for the 13 ringers (one nipped off early before the photo was taken!) attending the Witney and Woodstock Branch practice held at St Mary's, Witney on Saturday 12th January. A variety of doubles, triples and major methods were rung including Cambridge and touches of Stedman, with plentiful guidance and encouragement for those learning from the more experienced ringers in the group. An enjoyable morning was had by all. Tulie Minch.

A Brand New Bell at Kidlington!

A new bell has been installed in St Marys, Kidlington Tower on New Year's Eve...... but not quite like that! This bell is a working model made by one of our ringers, Phil Sampson. It's an authentic bell and comes from the Whitechapel Bell Foundry and swings in a frame made from *Meccano*! The headstock and wheel are also Meccano, and the stay, made of ash, comes from an old broken full size stay. The wheel is actually two wheels joined together to give it more stability. Meccano parts are almost as old as Phil (!) and he really hopes that you will pop up to a Tuesday practice at Kidlington and have a quick ring on his model bell and a longer ring on the full sized ones. (Could this be a first for Meccano?) Ron Burgess.
